Materials**

INF-EN-2018.08 • page 1/2

We offer precisely tailored to the needs of the automotive and industrial sectors **POLISHING COMPOUNDS, WAXES & ADDITIVES**

**A full line of innovative polishing materials - for paintshops, bodyshops, workshops, industrial plants and auto-detailing!
Designed for fast application and immediate results. For use on any type of coating.**

Suitable for different needs and applications in polishing systems: one-step (1-STEP) and two-steps and for detailing.

Polishing materials of the highest quality at optimal prices!

Usage: Paints and coatings in every condition. Automotive coatings of all types (also VHS/UHS, scratch-resistant coatings, ceramic and nanocoatings!). Industrial and marine coatings. Surfaces from stainless steel, aluminum, chrome and plastics.

Benefits: A real polishing effect and a deep gloss. No silicones and fillers, no camouflage (test: active foam), no holograms! Effective removal of scratches and damages. Temporarily "softening" the surface during polishing for even faster results. Exceptional performance, lower and efficient material consumption. No polishing residues. Easy to apply and spread on the surface in all planes, without stains. Reduced dusting during machine polishing. Excellent lubricating properties for protection against overheating of coatings. Additional ingredients for long-lasting protection and maintenance.

Innovations: Materials based on ecological raw-materials and water - additionally resistant to freezing - novelty! **F*R** (Frost Resistant) even to -40 °C/F (lab-test: 200 h - without loss of quality and properties). Advanced formulations using the latest generation of abrasives! All parameters precisely adapted to the actual requirements of the automotive and industrial sector.

One-step Polishing Compounds: 1-STEP (72)

**Polishing Compound EURO-LAK™
7299 HIGH CUT**

High-cutting one-step compound. Quickly restores gloss, original color and structure. Very easily removes deep scratches from heavily shabby and hard coatings. Quickly removes matting of sandpaper P2000.

Cutting ✎ 9/10 - **Gloss** ✨ 8/10 - **Speed** ⌚ 9/10

**Polishing Compound EURO-LAK™
7287 FAST CUT**

Fast high-cutting one-step compound for instant glitter gloss on new coatings as well as heavily shabby and oxidized. Efficiently removes even deep scratches and matting of abrasive papers P1500-P2000.

Cutting ✎ 7/10 - **Gloss** ✨ 8/10 - **Speed** ⌚ 9/10

**Polishing Compound EURO-LAK™
7285 UNI CUT**

Universal and economical one-step compound for correction of painting errors and defects on fresh coatings. Efficiently removes scratches of various thicknesses and matting after many gradations of sandpapers P1500, P2000, P2500.

Cutting ✎ 6/10 - **Gloss** ✨ 8/10 - **Speed** ⌚ 8/10

**Polishing Compound EURO-LAK™
7283 FAST GLOSS**

Fast one-step compound for uniformly smoothing the polished surface to mirror gloss. For a little worn coatings and new ones. Removes medium and fine scratches, easily removes matting of sandpapers P2000-P2500.

Cutting ✎ 5/10 - **Gloss** ✨ 9/10 - **Speed** ⌚ 8/10

**Polishing Compound EURO-LAK™
7298 ULTRA CUT**

The best one-step compound in the line. Instantly gives a deep gloss, without holograms. Contains the most modern abrasives for ultra-strong cutting on all types of coatings, also resistant to scratches and ceramic. Removes matting of sandpapers P2000-P3000.

Cutting ✎ 8/10 - **Gloss** ✨ 9/10 - **Speed** ⌚ 10/10

**All one-step compounds are also available in the
FR*20 version - Frost-Resistant up to -20 °C (-4 °F)!**

INF-EN-2018.08 • page 2/2

**Two-steps Rubbing Compounds, high-cutting: POLISH (73)****Rubbing Compound EURO-LAK™****7399 HIGH CUT**

High-cutting two-steps compound for professional polishing works. Very easily and effectively removes deep scratches from heavily shabby and hard coatings. Quickly removes matting of sandpaper P1500.

Cutting ✂ 10/10 - Gloss ✨ 8/10 - Speed ⌚ 8/10

**Rubbing Compound EURO-LAK™****7398 ULTRA CUT**

The best in the line professional two-steps compound. Provides ultra-strong cutting and instant work on all types of coatings, also resistant to scratches and ceramic. Contains the most modern abrasives for immediate effect. Removes matting of sandpaper P2000.

Cutting ✂ 9/10 - Gloss ✨ 9/10 - Speed ⌚ 9/10

**Rubbing Compound EURO-LAK™****7389 HIGH GRIND**

The strongest high-cutting compound in the line. Coarse-grain initial compound for easy removal of even very deep scratches or long-term oxidation of the coating. Moderate gloss. Easily removes matting of sandpapers from P1200-P1500.

Cutting ✂ 10/10 - Gloss ✨ 7/10 - Speed ⌚ 7/10

All rubbing compounds are also available in the **FR*40 version - Frost-Resistant up to -40 °C (°F)!**

Finishing Compounds for a high gloss: FINISH (74)**Finishing Compound EURO-LAK™****7483 FAST GLOSS**

Fast medium-grain compound for uniformly smoothing the polished surface to mirror gloss. For a little worn coatings and new ones. Removes medium and fine scratches, easily removes matting of sandpapers P2000-P2500.

Cutting ✂ 5/10 - Gloss ✨ 9/10 - Speed ⌚ 8/10

**Finishing Compound EURO-LAK™****7492 ULTRA GLOSS**

The best in the line fine-grained finishing compound. Instantly gives a deep gloss, without holograms and reflections. Efficiently removes residues of previous steps. Refreshes fewly worn coatings of various types, also ceramic.

Cutting ✂ 6/10 - Gloss ✨ 10/10 - Speed ⌚ 9/10

Car Glazes and Maintenance Materials: GLAZE (75)**Car Glaze EURO-LAK™****7591 ULTRA GLAZE**

An efficient finishing glaze for removing holograms, polishing residues and fine scratches. Provides a quick and even finish. Gives a deep shine and gloss to new and old coatings, especially black and dark colors.

Cutting ✂ 6/10 - Gloss ✨ 10/10 - Speed ⌚ 10/10

**Instant Wax EURO-LAK™****7549 QUICK WAX**

The hardest natural wax - **carnauba!** for instant application. Gives a mirror shine and gloss. Restores the original color. It does not leave residues or holograms. Regenerates, has delicate abrasive properties. Provides long-lasting protection.

Cutting ✂ 4/10 - Gloss ✨ 10/10 - Speed ⌚ 10/10

Supplementary Materials and Additives:**Inspection Fluid EURO-LAK™****76XX DETECTOR**

Multifunctional fluid for polishing works. Very efficient! Facilitates visual inspection and evaluation of the real effect, it quickly detects non-polished places. Perfectly cleans, degreases, removes polishing residues and enhances the resulting gloss. Strengthens the hydrophobic properties of the polished surface. Very easy and fast to use.

**Polishing Agents EURO-LAK™****74XX SPECIAL CPR**

Specialistic polishing agents CPR (Clean, Polish, Restore). Perfectly clean the surface. They remove small scratches, cracks and oxidation. They restore the original color and structure. They protect against the influence of weather conditions, ensure long-lasting protection. They do not contain aggressive abrasive elements.

Numbering order
 Polishing Materials
 EURO-LAK™

72XY - 1-STEP (One-step Polishing Compounds)
 73XY - POLISH (Two-steps Rubbing Compounds, high-cutting)
 74XY - FINISH (Finishing Compounds for a high gloss)
 75XY - GLAZE (Car Glazes and Maintenance Materials)

X (third digit)
hardness of abrasive
 0 - soft
 9 - aggressive

Y (fourth digit)
abrasive size
 0 - fine grain
 9 - coarse grain
